

Smart Irrigation: Remember to adjust your irrigation schedule to the season.

- ✓ Inspect your irrigation system.
- ✓ Develop an irrigation schedule.
- ✓ Reduce your watering in the fall and spring.
- ✓ Replace the battery in your irrigation controller.
- ✓ Turn off your irrigation during the wet winter months.

## Irrigation Tips

- ✓ Water between 8pm and 8am, when temperatures are cool and the winds are calm.
- ✓ Place 3 to 4 inches of mulch around the base of plants. Mulch will cool the soil and reduce evaporation.
