COASTSIDE COUNTY WATER DISTRICT

RULES AND REGULATIONS FOR RESIDENTIAL FIRE SERVICE INSTALLATION

1/2" – 1 1/2" Service

General Requirements

1. The project shall be subject to approval by the District.
2. The applicant shall pay all project costs including District design, inspection and administration, construction, tests, permits, and other applicable charges and deposits imposed by the District and other agencies.
3. For installation requirements which differ from the District Standard Installation Details, project design will be accomplished by the District Engineer at cost to the applicant.
4. Construction shall be in conformance with District ordinances, resolutions, policies, procedures, standard installation details, engineering standards, and rules and regulations.
5. Construction will be performed by the District and the applicant will pay the actual cost on a time and material base.
6. Full right, title, and interest to the pipelines and appurtenances installed is hereby granted to the District subject to acceptance of the project by the District. The applicant warrants that upon passage of such title to the District the title shall be free and clear from any and all liens, charges, and encumbrances whatsoever. The applicant will, upon request, execute and deliver a deed or other document conveying title to the District.
7. The installed facilities shall be used solely for fire protection purposes.
8. The fire protection system piping shall be in conformance with State and local cross connections requirements. Where required, the applicant shall install a backflow prevention device as required by cross connection regulations. No fire pumps shall be connected to the fire protection system piping without the written approval of the District.

Procedure for Processing Applications for Residential Fire Service Installation

1. Following receipt of the application, the District will analyze the project requirements. The District by letter will forward to the applicant a cost estimate for the installation of the fire meter and/or fire service.
2. Upon receipt of payment of the cost estimate, the District will install the fire meter and/or service to the property.
3. After completion of the project, if the actual cost of the installation is less than the estimated amount, a refund will be sent to the applicant. If the actual costs are greater than the estimate, the applicant will be billed for the difference.
