

PUBLIC NOTICE

Coastside County Water District FLUSHING OF WATER MAINS

The Coastside County Water District will be flushing water mains in the El Granada area during the month of March. These areas include: Clipper Ridge, Princeton and El Granada. The flushing operation is part of a scheduled preventative maintenance program to help maintain good water quality in our system.

As we flush your area, you may experience a temporary reduction in water pressure or you may also see some discoloration. These conditions are normal during flushing activities and only temporary. If you should experience any of these changes or if you see some cloudiness or rust color in your water, we recommend you refrain from using hot water and appliances that use water, until it clears. If you find that your water is discolored run your hose bib that is the farthest from your water meter for about 10 – 15 minutes. If the water hasn't cleared, contact our main office at (650) 726-4405.

Please contact our office at (650) 726-4405 if you have any questions about our flushing program or your water service in general.

Joe Guistino, Superintendent of Operations
